Subject: I (ii) The Composition of the Election Committee

    Move To: 

Dear Sir

Refer to the composition of the EC, I suggest that which should be similar to the composition of the legislative council (LC). Since the government agrees at this moment the composition of LC is suitable for Hong Kong. Therefore the EC should include at least half of the member elected by geographical constituency. For the supporting of the development of the political parties in Hong Kong, some of the seats can be allocated according to the percentage of votes the parties get from the election. Since CE is the leader of the Hong Kong, its election method should not exclude the view from citizen.

Reagrds,
Simon
