Subject:(I) (i) The Number of Members of the Election Committee

    Move To: 

I would proposed the members of the Election Committee extend to all HK Citizens aged over 18.

Rationale

Only 30 members from the members of Legislative council and some other members of the district-based organizations are elected by HK citizens through direct elections.

The other members are appointed/elected through other means and that means they represent their own interests and not for interests of all HK citizens

It is unfair why others get more than 1 vote

The previous 2 elections already demonstrated how stupid, unfair and lack of representation this 800-member election system worked.

Subject: Re:(iv) The Delineation of the size of Electorate of Legislative Council functional constituencies in

    Move To:

In principal, all functional contituencies must be abolished. In view of the restrictions imposed in the Basic Law, I propose to abolish the corporate electorates and the non-individual electorates of these functional constituencies and the electorates should be individuals to make the functional contituencies more representative. e.g. abolish all the corporate member or trade unions, the electorate should be individual members/employees of the corporate/trade union.

Rationale

This is more open and fair.

It is more representative and ensure no manipulation of votes.
