

Democracy is a FARCE.

Most people (90%+) are most selfish. "Democracy" is only a political mechanism which advocates selfishness without reciprocal contribution and/or harmony & unity. Recent political events have proved the combination of an elderly lady (poor person), a politician (cunning opportunist) and a lawyer (hypocrite) is a disastrous combination for the welfare of HONG KONG. It is a classical case of poor people who are abusing their right and don't know their place. When poor people are invited to freely elect their leader, Hong Kong will guarantee to become communist. China is copying HONG KONG'S past success, honing her economy. HONG KONG is copying the failure of the West, playing politics and red guard. The first 100 yrs of HONG KONG success did not come from political play, it came from genuine contribution from her people without asking anything back.

∴ The chief executive should be nominated by CHINA. He can be deaf, blind & dumb. No big deal. 80% of the MP should be made up of members is without any party biased.
