Subject: Additional Seat in the Legislative Council

    Move To:

I- According to 2001 population census non chinese are about 5% , so according to this ratio 5% representation should be given to the ethnic minorities in to advisory and statutory bodies (Legislative Council , District Council's etc).HK is a cosmopolitan city having various ethnic groups,to provide ,equality,racial harmony,eliminate race discrimination,and

to solve ethnic minorities general problems by their own representative's,it

is necessary to give them representation according to their ratio and let them serve as members of those bodies.This is truth that Hk is a largely homogenous society and ethnic minorities are not homologous,as local Chinese,but we should'nt ignore them regarding their representation ,representation will also play a major role for bridging the gap between Chinese and non Chinese residents of HKSAR,so concrete steps should be taken

regarding this issue and a clear policy should be announce.According to my point of view legislation is required regarding representation of minorities according to their ratio.

Syed Muhammad Naeem Asim
