

Democracy is synonymous with Socialism.  
 It represents powerplay and distribution  
 of resources through political tricks  
 It represents manipulation of numbers  
 for the pure purpose of getting into  
 power by many individuals or  
 politicians who have secret agenda  
 for their private benefits. At  
 the end of one's power struggle  
 from survival, to money to power  
 and fame. The latter stages usually  
 evolve to the detriment of the  
 harmony and peace of the society.  
 What we really need is the old  
 Hong Kong work ethic - play hard  
 and work hard, "can-do" with a  
 sense of humour. The achievement of  
 Hong Kong for the first 100 years was  
 based on sheer hard work and common  
 sense and definitely not from politics. We  
 need 80% constituent MP at LEGCO for unbiased  
 honest, independent candidates for the good of HONG KONG
